Definition of Charges and Terms

Water Service Charge: The charge associated with maintaining the account (i.e. meter reading, billing, etc.). This charge is based on the size of the meter or on the size of the service line.

Water Consumption Charge: The charge of each unit (748 gallons) of water actually used in a billing cycle.

Utility Tax: Utility tax levied on all non-residential accounts.

Wastewater Service Charge: The charge associated with wastewater customer service and billing costs.

Wastewater Charge: Calculated charge based on the cost of collection, transporting, treating and disposing of each unit of wastewater discharged into the sewer system. Wastewater charges are calculated by multiplying water consumption by an assigned flow factor.

Discharge Unit: Each discharge unit is equal to 748 gallons of wastewater returned to the sewer system.

Flow Factor: The percentage of metered water use returned to the sewer system as wastewater. For purposes of determining applicable charges, the percentage of water use returned to the sewers is assumed to be 90% for single family residential users and non-residential users, and 95% for multifamily residential users. Residential users may appeal their assigned flow factor on the basis that a portion of water used is for irrigation purposes by contacting the Customer Services
