

FOUR SEASONS
RESORT
MALDIVES AT LANDAA GIRAAVARU

FOUR SEASONS RESORT MALDIVES AT LANDAA GIRAAVARU
ENVIRONMENTAL ACTION PLAN 2022

the planet deserves more than half measures

1. Introduction

This document defines the resort's yearly Environmental Action Plan. The action plan focuses on the various aspects from the key performance areas (Risk Assessment Version 2.1) that have a moderate or a high potential environmental impact. The objectives, targets and call to actions to mitigate the impacts are identified in this document.

The Environmental Action Plan is reviewed annually.

2. Environmental Action Plan 2022

#	Key Performance Areas	Objective	Target	Action Item(s)	Assessment	Responsibilities
1	Greenhouse Gas Emissions	Reduce diesel consumption	2% reduction with respect to 2021 2022 (Target): 10,798,239.76 kWh 2021: 11,018,612kWh 2020: 8,676,945kWh 2019: 10,585,968kWh 2018: 11,213,619kWh	- Replacement of old AC units to energy efficient AC units in employee village: E3, E4, E5 and M6 (Total 68 rooms) by end of March 2022. <i>((The whole E-Hotel project will achieve to save approximately 60,000 kWh per month compared to the old units. This equals to a saving of 16,304 litres of diesel per month = 44 ton CO2))</i> - Replacement of old AC units to energy efficient units in the following public area buildings: Resort Clinic, Jalsa, Library, Housekeeping, Afterhours, Boat Dock, Dive Center, Powerhouse, Kids Club, STP and Water Plant by August of 2022) - Upgrade R/O plant 1 to a daily 270m3 capacity by end of quarter 3 (Total Energy Saved Per Year: $3.1\text{kWh/m}^3 \times 250\text{ m}^3/\text{day} \times 360\text{ day/year} = 279,000\text{ kWh/year} = 75,815\text{ Liters of diesel (76 ton of CO}_2\text{)}$) - Individual digital meter reading to be installed in new Individual units of new Manager Block upon completion of the project by end of July 2022 and communicate monthly consumption to the staff.		Director of Engineering & Chief Engineer

		Educate employees on environmental issues to help them make more responsible decisions	Increase awareness and achieve behavioural changes	- Conduct 2 environmental awareness update sessions annually during townhall meeting in February and August - Environmental Awareness Module in Embark - Two updates on the EAP for the department heads. - Earth Day celebration activity (Friday, April 22, 2022) – A school event with MDC or a beach/reef clean-up		Environment and Sustainability Leader & Director of P&C
		Mitigate impacts of employee carbon footprint	Measure emissions of employee travel and encourage compensation or offsetting.	- Provide opportunities to compensate staff travel emissions by Q3, 2022 - Continue to grow FS TIST forest		Environment and Sustainability Leader & Director of P&C
2	Energy Efficiency, Conservation and Management	Reduce energy through more efficient light bulbs, Water Heaters and HAVC system	All CFL and Fluorescent lights to be replaced with LEDs. All staff compound AC to be replaced with energy efficient models. 100 series guest room water heaters to be replaced to EVO Heat pumps. Fix the guest room AC INCOMM system Install a higher capacity R/O Plant to reduce energy consume to produce water	- Replacement of E-Hotel CFL light to LED lights (Manager Block 1 to 6 (Total 144 LED) by end of June 2022 <i>(This would achieve a saving of 311.04 kWh per month which is 84.52 litres of diesel once the project is fully complete)</i> - All the Kitchen Public area buildings CFL light to LED lights (Total 875 LED Tubes) by end of August 2022 <i>(This would achieve a saving of 11340 kWh per month which is 3081.52 litres of diesel once the project is fully complete)</i> - EVO Heat Pumps to install in newly renovated guest villas by May 2022 - INCOMM system issue rectification by end of June 2022 - Upgrade R/O plant 1 to a daily 270m³ capacity by end of July 2022 - Solar Water Heaters to install in the new Manager Block.		Director of Engineering & Chief Engineer

3	Management of Fresh Water Resources and Waste Water	Reduce freshwater consumption.	Reduce monthly water consumption from YTD 2021 by 1% 2022 (Target): 136,712.07 m3 2021: 138,093 m3 2020: 102,621 m3 2019: 123,893 m3 2018: 124,545 m3	- Water proofing of water villa pool tiles overflow issue by August, 2022 - Implement use of sludge treated water for WC Flush tank by doing a setup in new Manager block by end of August, 2022 - Rainwater Harvest project to be completed by end of November, 2022 for 1 staff block		Director of Engineering
4	Land use planning and management.	Reduce erosion of resort's beaches	Protect northern beach	Sand reclamation project to makeup the eroded beach of northern side of the island by July 2022		Director of Engineering & Chief Engineer
5	Solid waste management	Reduce the practice of disposing food waste and sludge into the ocean.	Complete stop of throwing food waste into the ocean	- Install a second bio-digester or similar equipment to manage during high occupancy by June 2022 - Construct STP Enclosure and conduct quarterly service by the Service Provider to ensure a smooth run of STP and bio digester		Director of Engineering
		Reduce waste destined for landfill	Replace non degradable packaging where possible. 2022: 2021: 853 Tonnes 2020: 884 Tonnes waste	- Purchasing: Negotiate with vendors with biodegradable packaging - Housekeeping: Explore a way to Recycle Soaps - Employee shop: No pet bottles, no plastic cup noodles, biodegradable yogurt packaging etc. - Explore ways to reduce food waste in kitchen		Director of Purchasing and Environment and Sustainability Leader

ENVIRONMENTAL ACTION PLAN

6	Environmentally harmful substances and emergencies	Reduce risk of hazards	Replace petrol storage tank.	Construct safe underground petrol storage tank by end of June 2022.		Director of Engineering
		Tsunami or flood	Immediate response for a possible tsunami warning	Tsunami evacuation plan is in place.		Director of Security
		Use of fire in public areas	Stop any possible fire hazard	- Monitoring and regular maintenance of the fire extinguishers - Regular Firefighting team drills		Director of Security
		Diseases / Pandemics and Food borne illnesses	Control a community spread of a disease	- Follow the Lead with Care protocols and national health protocols and regular testing for COVID-19 - Annual hygiene testing for all employees		Director of P&C
