

FOUR SEASONS
RESORT
MALDIVES AT LANDAA GIRAAVARU

Waste Management Plan (November 2021)

Four Seasons Resort Maldives at Landaa Giraavaru

Waste Management Plan

Four Seasons Resort Maldives at Landaa Giraavaru specifically targets the reduction of waste as one of its key environmental performance areas. It is recommended that the organization implement a waste management plan to minimize the production of any solid waste and ensure disposal will not have an adverse environmental impact.

Our Waste Management Plan is a tool which provides guidance for the design and implementation of programs for the control of waste throughout the Resort. It has been developed for Four Seasons Resort Maldives at Landaa Giraavaru operation and those responsible for sustainable performance. This is designed as Plan-Do-Check-Improve method:

PLAN-DO-CHECK-IMPROVE

Plan: Identify an opportunity to improve a process or processes

Do: Implement the improvements identified

Check: Assess the results to determine how effective initiatives are

Improve: Continual improvement in annual Benchmarking Assessments

PLAN

Purchasing Policy

The resort ensures local and fair trade goods and services are purchased by the business, where available. As such we are committed to a Purchasing Policy for the procurement of local food, goods, other consumables, and services where applicable. A purchasing policy is an effective tool to minimise waste since it allows you to determine the kinds of products and services that are delivered to the resort and how they are packaged.

The resort is committed to the following initiatives through a Waste Management Plan:

- Give preference to purchasing products with minimal packaging and less plastic;
- Give preference to products that are less harmful to the environment.
- Purchase fresh food in reusable crates and containers that can be recycled like cardboard or paper instead of plastics;
- Engage key suppliers about their commitment to working with us to reduce waste through packaging and more less harmful materials;
- Ensure that perishable products are placed in storage as soon as possible after delivery.
- Recycle plastic bottles through Parley for the Ocean.

DO

Reducing waste sent to landfill

In a commitment to reduce waste sent to landfill, the key is to dispose the mandatory waste in a more responsible way that would have a minimum impact on the surrounding environment. A large proportion of our waste are generated from packaging of goods we purchase and as well as through resort landscaping.

In documenting a Waste Management Plan, we work with each department throughout the resort to implement waste minimisation initiatives, including the identification of responsibilities and targets.

Waste Area	Waste Management Practice	Target
Maintenance/Landscaping	Garden – cuttings, grass clippings (composting/green waste collection)	Garden greenwaste to chop using chipping machine and use it in gardening.
	Used engine oils and batteries tightly pack and place in a dedicated storage area	Send it to an oil recycling facility (In search)
F&B/Staff Canteen	Explore sustainable coffee programme (outlets)	To find such a program by end of 2021
	Explore sustainable alternatives to disposable kitchen supplies (plastic wrap, gloves, pastry bags) (Purchasing	

F&B / Staff Canteen Food	Staff canteen food waste chart	Display total food waste of each meal and encourage staff to empty their plate to meet the daily targets
	Bio-digester installation	Process 500Kg of food waste daily into liquid form
Purchasing	Explore and use suppliers that deliver goods in re-usable or bio-degradable packaging	
Administrative Offices	Strick rule to print paper on both the sides	
	Use e-mail for distribution of meeting minutes and reports	
	Reuse copy paper boxes for file storage.	
Front Office	Business centre – office paper, newspapers, magazines (set up recycling systems)	
	Lobby area – newspapers, magazines, (papers on request)	
Housekeeping	Guest room used soap recycling program	Setup Sundara Soap recycling method in Raa Kinolhas
	Coffee capsule recycling program	Collect used Nespresso coffee capsules and send it to Vendor for recycling

Check

Waste Audit

Our Waste Audit is simply an assessment of waste that is generated. It is a valuable tool as it tells us:

- How much waste there is in total
- What the waste consists of and the quantities of each type of material
- Where the waste was generated
- Where it ends up (e.g. landfill, composting plants or recycling facilities)

Using this information it is possible to target activities and suppliers producing the most waste going to landfill. It helps to identify where reducing waste at the source is going to be most practicable and effective. Waste audits also identify environmentally viable alternatives to landfill for the waste that cannot be eliminated, and we can look at alternative methods of disposal such as reuse, recycling or composting.

Here is sample of our Waste Tracking Sheet.

Waste Sent to Land Fills - Track Sheet – Four Seasons Landaa Giraavaru

Month:
April 2021

Week	Waste Material	Boat Trip 1		Boat Trip 2		Name	Sign
Week 1	Batteries		Numbers		Numbers		
	E-Waste		Kilogram		Kilogram		
	Oil (Kitchen)		Liters		Liters		
	Oil (Engine)		Liters		Liters		
	Food Waste		Kg		Kg		
	Mixed Waste		Tonnes		Tonnes		
Week 2	Batteries		Numbers		Numbers		
	E-Waste		Kilogram		Kilogram		
	Oil (Kitchen)		Liters		Liters		
	Oil (Engine)		Liters		Liters		
	Food Waste		Kg		Kg		
	Mixed Waste		Tonnes		Tonnes		
Week 3	Batteries		Numbers		Numbers		
	E-Waste		Kilogram		Kilogram		
	Oil (Kitchen)		Liters		Liters		
	Oil (Engine)		Liters		Liters		
	Food Waste		Kg		Kg		
	Mixed Waste		Tonnes		Tonnes		
Week 4	Batteries		Numbers		Numbers		
	E-Waste		Kilogram		Kilogram		
	Oil (Kitchen)		Liters		Liters		

	Oil (Engine)	Liters	Liters		
	Food Waste	Kg	Kg		
	Mixed Waste	Tonnes	Tonnes		
Week 5	Batteries	Numbers	Numbers		
	E-Waste	Kilogram	Kilogram		
	Oil (Kitchen)	Liters	Liters		
	Oil (Engine)	Liters	Liters		
	Food Waste	Kg	Kg		
	Mixed Waste	Tonnes	Tonnes		

Total for the Month:	Total number of Batteries:	
	Total KG of E-Waste:	
	Total Liters of Oil Kitchen:	
	Total Liters of Oil engine:	
	Total Tonne of Mixed Waste:

IMPROVE

Annual Benchmarking Assessment (EarthCheck)

Under the Four Seasons Resort Maldives at Landaa Giraavaru EarthCheck participation, the resort will submit Benchmarking data for waste management in EarthCheck database and based on the result a continual improvement is measured annually when the resort goals are set.

From the results of Benchmarking the resort targets and objectives can be quantified over the years.
